

BRANHAM300 Recognizes OmniGlobe Networks as “Canada’s # 1 Growth Technology Company”

The global telecommunications company also ranks high in the “2008 Top 250”

Montreal, QC, Canada, April 9th, 2009 – OmniGlobe Networks, the privately-held telecommunications company, is pleased to announce that it has been named as “Canada’s #1 high tech growth company” in the prestigious BRANHAM 300 listing, achieving the highest year-over-year growth of any company appearing on the 2008 Top 250. The company, which was identified last year as a “Top 25 Up and Comer”, made its appearance in the Top 250 listing, proudly sharing the 164 position with its technology partner Compute. The rankings, which are published annually, were released last week in the March/April issue of Backbone Magazine and distributed nationally through the Globe and Mail.

BRANHAM300 is the most comprehensive and trusted source on the health of the Canadian Information and Communications Technology (ICT) industry. The Top 250 listing rates Canadian companies, solely based on sales revenue generation. OmniGlobe Networks managed to thrive in these uncertain times, and recorded an impressive 400% increase over 2007.

“We are very pleased to be once again recognized on the Branham list and to make our debut on the Top 250 list.” said Jason Neale, OmniGlobe’s CEO. “Our success is down to the sheer determination and commitment of our fantastic team and partners, coupled with top notch products and services that help bridge the digital gap between developed areas and less developed ones by providing vital communication services in places where there are the most needed, in Canada and around the world.”

“To experience growth at such a paramount level in the face of economic uncertainty is an achievement that cannot be overlooked,” says Wayne Gudbranson, President and CEO of Branham Group Inc., “It is very rare for companies who appear as an Up and Comer one year to make such a significant debut on the Top 250 listing the following year. OmniGlobe Networks has very quickly emerged on the ICT scene, and solidified itself as a leader in their industry sector.”

About OmniGlobe Networks

Founded in 2004 and based in Montreal, QC, OmniGlobe Networks is a global telecommunications company that delivers reliable and affordable broadband, cellular and satellite communications services

to geographic regions around the world where terrestrial telecommunications are unavailable, unreliable or too expensive.
