

Satellite Program Sub-Contract Manager

Location: Pointe-Claire (Montreal), QC

Start: ASAP

OmniGlobe Networks (www.omniglobe.com) is a Canadian-based, global telecommunications company that provides affordable, satellite and WiMAX broadband Internet, VoIP, tele-education, telemedicine and cellular services to world regions where terrestrial telecommunications are unavailable, unreliable, or simply too expensive. We are one of the fastest growing companies in Canada and are backed by the Business Development Bank of Canada (BDC).

OmniGlobe Networks has recently announced its intention to procure, launch and operate a Ka-Band Fixed Satellite Service (FSS) geostationary communications satellite over Canada. We are seeking a sub-contract manager to assist in this exciting opportunity.

Reporting to the Director of the Satellite Program, the successful candidate will be part of a dedicated team working on the CANUK-1 satellite program.

Responsibilities:

- Scope/schedule/price management of subcontractor(s).
- Negotiation and management of subcontracts
- Risk management
- Development of project plans, budgets & schedules
- Monitoring of sub-contractors on a regular basis.
- Establishment of processes required for successful sub-contract management
- Support to overall management of project.
- Support to enabling successful team working arrangements
- Support to oversight of technical solution for program
- Report and proposal writing as required
- Preparation of funding applications, and interaction with funding agencies as required

Mandatory requirements

- Business or engineering degree or equivalent
- Minimum 5 to 10 years experience in program and/or subcontractor management, in addition to several years experience preferably in an engineering environment.
- Experience of managing multi-million dollar programs in an international environment.
- Experience in project management methodologies and tools
- Excellent interpersonal and communication skills

- ◆ Candidate must be willing to travel within Canada and internationally

Assets

- ◆ Master's degree.
- ◆ Experience in satellite communications.
